therapy, direct, of deep-seated tumors, 969
therapy, irradiation diagrams in (abs), 570
therapy, one and one-half years' experience with supervoltage, 369
therapy, supervoltage, comparative clinical value, 350
therapy, use of long target-skin distances in, 343
therapy, year's experience with 800 kv., 366
tubes, direction indicator for (abs), 571
ROENTGENOGRAMS, experimental study of detail in, with different techniques of exposure (abs), 570
ROENTGENOGRAPHY of head in erect posture, device for, 692
ROENTGENOLOGY, Department of, of Massachusetts General Hospital, history of, 727
influence of George W. Holmes on (E), 993
ROENTGENOMETRY of mediastinum (abs), 704
ROENTGENOSCOPE, value of, in pulmonary tuberculosis case-finding (abs), 699
ROENTGENS, gamma-ray measurements in, 94
interpretation of dosage in (abs), 142

SACRALIZATION, effect of radiotherapy on (abs), 137
SARCOMA, bone, studies in (abs), 140; (abs), 141
osteogenic, treatment of, by irradiation (abs), 134
SCHREINER DISK in roentgen sensitometry (abs), 574
SCHÜLLER-CHRISTIAN'S DISEASE: See Xanthomatosis
SEMILUNAR CARTILAGE, internal, ossification of (abs), 424
SEPTAL DEFECT, interatrial (abs), 123
SEPTIC THROAT, acute, roentgen treatment (abs), 137
SILICOSIS, pulmonary, roentgen observations regarding, in porcelain workers (abs), 288
SKELETON, blastomycosis of (abs), 425
Hodgkin's disease of, without glandular involvement (abs), 426
SKIN, cancer, treatment of, by divided doses of high voltage roentgen rays, 332
epitheliomata of, physical treatment of (abs), 431
studies of dosage of, in roentgen diagnosis (abs), 571
SKULL, linear fractures, healing of, 744
tumor within, reliability of roentgen signs, 737
SPINA BIFIDA OCCULTA, incidence of, in children, with and without enuresis (abs), 429
SPINAL CANAL, multiple tumors within, diagnosis by myelography, 775
protrusion of intervertebral disc into (E), 409
roentgen demonstration of rupture of intervertebral disc into, after injection of lipiodol, 782
SPINE, lumbar, accessory articular processes in, 763
roentgen changes in, in intraspinal tumors (abs), 716
SPLEEN, irradiation of, with roentgen rays, in treatment of metrorrhagia at puberty (abs), 566
reaction of, to roentgen irradiation after intravenous injection of thorotrast (abs), 419
STASIS, importance of roentgen diagnosis of, in pulmonary veins of cardiacs (abs), 123
STENOSIS, bronchial, in pulmonary tuberculosis (abs), 284
STEREOGRAMS, roentgen, measurements by, in orthopedics (abs), 569
STERILIZATION in carcinoma of breast, 65
STOMACH, cancer, early diagnosis, 875
carcinoma of (abs), 129
distribution of arteries in mucosa and submucosa of, in relation to mucosal relief (abs), 292
ectopic, 309
inoperable malignancy, radiation therapy of, 324
primary isolated lymphogranulomatosis of (abs), 710
roentgen appearance of, after Judd's operation (abs), 710
roentgen appearance of duodenum in tumor of (abs), 711
roentgen symptomatology of benign tumors of (abs), 710
rugae of, and their relation to vascular system (abs), 292
SUBARACHNOID SPACE, roentgen exploration of (abs), 715

Subluxation, so-called congenital, of hip, ischial-pubic sign in prophylaxis of (abs), 423
Surface tension, marginal, influence of 1:2:5:6 dibenzanthracene on, between oil and serum (abs), 574
Sympathetic nervous system, roentgen therapy of (abs), 432
Syringomyelia, roentgen diagnosis and treatment (abs), 718

Technique, new, for lateral view of clavicle (abs), 131
simple method of exact centering of head, 116
simple roentgenographic, for unilateral density of chest, 115
Teeth, evaluation of roentgen findings about, in relation to focal infection and systemic disease, 751
Teratoma of testis (abs), 133
Testis, teratoma of (abs), 133
tumors, results of treatment (abs), 135
Tetraiodophenolphthalein in treatment of certain selected cases of cholecystitis (abs), 419
Thoracopagus, 521
Thorax, double-exposure roentgen technique for (abs), 569
orderly procedure in roentgen diagnosis within, 180
roentgen diagnosis of neurinoma within (abs), 278
simple roentgenographic technique for unilateral density of, 115
Thorium, colloidal, use of, in experimental roentgenography of lungs (abs), 572
Thorotrast in roentgen study of liver abscess, 923
reaction of liver and spleen to roentgen irradiation after intravenous injection of (abs), 419
roentgen diagnosis of inflammatory foci in bones by means of small quantities of (abs), 140
Thrombophlebitis, treatment of, by roentgen irradiation (abs), 135
Thymus, late effects of irradiation of, 498
Time-intensity factor in relation to genetic effects of radiation (abs), 574
Tissue cultures, action of radium on (abs), 142
Tissues, animal, metahistologic structure of fibrillary components of (abs), 572
soft, roentgen diagnosis of tumors of, 932
Tomography (abs), 570
its value in pulmonary diagnosis (abs), 278
Tooth slabs, factors influencing quantitative measurement of roentgen-ray absorption of, 391, 531
Tuberculosis, bone and joint, survey of, in Detroit municipal sanatoria, 44
bronchography as an aid in interpretation of roentgen shadows caused by pleuropulmonary changes in, 30
childhood type as revealed by roentgen ray (abs), 279
further study of, in public-school children (abs), 700
healing of cavities in (abs), 283
hematogenous pulmonary (abs), 286; (abs), 287
in children, roentgen diagnosis (abs), 122
intestinal, in 1,400 autopsies (abs), 417
intestinal, of ulcero-cicatricial type, and its relation to pulmonary tuberculosis (abs), 417
intrathoracic, roentgen diagnosis of, in children (abs), 121
miliary, roentgen differential diagnosis (abs), 279
of childhood (abs), 282
of lungs, bronchiogenic cancer combined with (abs), 289
of shafts of long bones (abs), 717
pulmonary, as part of systemic infection (abs), 287
pulmonary, bronchial stenosis in (abs), 284
pulmonary, in children (abs), 282
pulmonary, occurrence and development of atelectasis in (abs), 701
pulmonary, primary, in childhood (abs), 280
pulmonary, roentgen treatment (abs), 434
pulmonary, value of roentgen examination in surgical treatment of (abs), 702
pulmonary, value of roentgenoscope in case-finding in (abs), 699
relations between extrapulmonary and pulmonary (abs), 285
roentgen demonstration of early infiltration in lungs (abs), 279
survey among 2,000 food handlers in New York City (abs), 279
Tumor, brain, prediction of character of, from ventriculogram (abs), 276
superior pulmonary sulcus, 293
Tumors, animal, combined effects of fever and roentgen radiation upon, 983
benign, of stomach, roentgen symptomatology of (abs), 710
cartilaginous, possible relation of cartilaginous inclusions in rachitic bones to (abs), 428
deep-seated, direct roentgen irradiation of, 969
effect of radiation, lactate and iodoacetic acid on (abs), 141
extramedullary plasma-cell, of upper air passages (abs), 277
intracranial, reliability of roentgen signs, 737
intraspinal, roentgen changes in spinal column in (abs), 716
intrathoracic, orderly procedure in roentgen diagnosis of, 180
malignant, of middle ear, treatment of, at Radiumhemmet (abs), 433
massive, of kidney, preoperative irradiation (abs), 568

mixed, of type of mucous and salivary gland tumors localized in skin and subcutaneous tissue and their treatment (abs), 436
multiple, development of, in tarred and irradiated mice (abs), 141
multiple, within spinal canal, diagnosis by myelography, 775
non-obstructing malignant, of small bowel, 902
of bladder, treatment of (abs), 139
of pituitary gland, radiation treatment of (abs), 433
of pituitary gland, roentgen diagnosis (abs), 276
of testis, results of treatment (abs), 135
of thoracic aorta, differential diagnosis (abs), 706
soft tissue, roentgen diagnosis, 932
Twins, sporadic cretinism in one of (abs), 429

Ulcer, perforating, of foot, roentgen treatment of (abs), 134
Ultraviolet radiation, release of, from roentgenized substances by visible light, 381
Ureter, occlusion of, following radium implantation into cervix (abs), 133
primary carcinoma of (abs), 132
roentgen diagnosis of cystic widening of lower end of (abs), 421
Uterus, cancer, clinical results and histologic changes following radiation treatment of, 461
cancer, results of treatment by Stockholm method at Radiumhemmet (abs), 567
carcinomatous, pregnancy and normal delivery in, treated with radium and cured clinically (abs), 134
cervix, adenocarcinoma, prognosis and treatment (abs), 567
cervix, cancer, autopsy study of women dying with cervical cancer after irradiation (abs), 139
cervix, cancer, limitations of radium therapy in, 457
cervix, carcinoma, calculation of dosage in radium treatment of, 477
cervix, carcinoma, incidence of vaginal fistulae in patients with (abs), 133
cervix, carcinoma, radium therapy (abs), 566
cervix, carcinoma, roentgen therapy of pelvis in treatment of, 603
cervix, carcinoma, serious complications encountered during treatment of, 490
cervix, carcinoma, treatment with supervoltage roentgen rays, 368
cervix, ureteral occlusion following radium implantation into (abs), 133
Vagina, primary carcinoma of (abs), 135
Ventricles, landmarking of, in epilepsy (abs), 119
Ventriculogram, prediction of character of brain tumor from (abs), 276
technique and diagnostic evaluation (abs), 276
Vertebra, fifth lumbar, backward displacement of, an optical illusion (abs), 430
Viscera, intrathoracic, displacement of, resulting from pathological processes in (abs), 699
